

SA35

Streaming Integrated Amplifier

The ARCAM SA35 is the all-in-one streaming system for the discerning music lover. It includes hard-won technologies for preserving the most delicate sounds and reproducing music with all its subtleties, nuances and excitement intact. Expertly crafted in Cambridge UK.

Exquisite sound quality has been achieved through thoughtful engineering of a new 6-layer digital audio and streaming platform which includes a ground plane through the entire board to keep noise and interference away from the sensitive audio components. These components include the latest Hyperstream iV DAC topology from ESS, in a balanced configuration with advanced Jitter elimination. Sound quality is enhanced further with a new linear toroidal transformer power supply design that drives the entirety of the internal operation with lower noise.

The ARCAM SA35 is the ultimate high resolution audio solution. With outputs for subwoofers, along with Dirac Live Room Correction, the SA35 has the flexibility to deliver exceptional sound, in any room, with your choice of speakers. Our 5th generation Class G amplifier design is meticulously crafted so you can expect the best sound quality and dynamics from what has always been a better sounding, and more efficient Class of amplifier. New components and materials have been painstakingly analysed and reviewed to ensure uncompromising sound performance.

Up front, the SA35 features a new, bonded 6.5" high-resolution display to show album artwork and metadata. Connecting the SA35 to your home network with Wi-Fi is quick and straightforward with our ARCAM Radia App. Once connected, enjoy instant playback using Apple Airplay, Chromecast, Spotify Connect, Tidal Connect, and Roon.
