

Creator Series Mount Boxes

Product Information Guide | July 2025

Introducing Monitor Audio.

Founded in 1972.

At the forefront of British high-fidelity audio design and engineering for over 50 years, Monitor Audio continues to meet the demands of today's connected consumers and their desire to enjoy an enhanced listening experience.

- Monitor Audio was founded in 1972 by Mo Iqbal in Cambridge, United Kingdom. The company moved to its current Essex location in 1976.
- Today, Monitor Audio Group products are distributed into nearly 100 countries across six continents, through a network of specialist distribution partners.
- Monitor Audio loudspeakers are fully developed by Monitor Audio Group's in-house engineering and design teams under the group's Transparent Design Philosophy.

Creator Series Mount Boxes: Seamlessly surface mount any Creator Series In-Ceiling, or In-Wall speaker on walls or ceilings for a high-fidelity sound experience in any space. Surface-mounted. Effortless. Impressively simple.

Introducing the Monitor Audio Creator Series, Mount Boxes.

Wall & ceiling surface-mounted audio solutions that will transform your audio experience in any space.

Creator Series, Monitor Audio's fourth-generation of architectural speakers pushes the boundaries of integrated speaker solutions by including advanced acoustics technologies, and clever functional design elements. Increasing the flexibility of any Creator Series speaker, the all-new Mount Boxes allow a contemporary surface-mount, 'on-wall' and 'on-ceiling' solution, where fully integrated options might be more difficult to install.

The Creator Series Mount Boxes allow simple delivery of audio in spaces where fully integrated built-in solutions aren't an option - delivering high-fidelity sound without restrictions.

Listen Again.

Technical Director's Statement

“We offer some of the worlds leading architectural speakers. Built around three performance tiers and packaged with our leading acoustic technologies, this allows us to deliver exceptional SPLs, clarity and detail for a whole host of listening applications from stereo, multi-channel, TV surround and gaming to serious, dedicated cinema rooms.

What we've done with Creator Series Mount Boxes is harness this performance and make it more flexible by allowing the speakers to be surface mounted to ceilings and walls - without compromising one bit on sonic performance.

All the Mount Boxes have been carefully optimised to offer exacting volumes for the speakers to work perfectly, enabling them to deliver the SPLs that are intended.”

Michael Hedges – Technical Director

Design Director's Statement

"Designing the Mount Boxes with the exact volumes to allow the various Creator Series In-Wall or In-Ceiling speakers to work at the most optimum, were the most important design challenges we had to cater for.

We've managed to add some subtle design elements to enhance their visual appeal whilst keeping the overall design, clean, sophisticated and purposeful.

We've opted for a delicate grille design with a subtle shadow gap around the edge to add some visual appeal. The clothe is selected on its' acoustic properties and the colours aim to be as discrete as possible. We've included a magnetic MA logo which can be removed or positioned in portrait or landscape positions adding flexibility and style too.

With robust screw hole fixings, for the most secure fitment to a wall or ceiling, the Creator Series Mount Boxes, really offer a great solution to any environment that doesn't allow for fully-integrated speaker solutions."

Charles Minett – Product Design Director

Transparent Design Philosophy

Creator Series Mount Boxes are a product of Monitor Audio's Transparent Design Philosophy

We believe the ultimate loudspeaker and its associated accessories should allow sound to be laid down by the artist so accurately that it becomes transparent. The physical design should be sympathetic to this in any environment and work in harmony with the desire for transparency.

The all-new Creator Series Mount boxes are built upon an R&D philosophy of maintaining a balance between design and technology. One is never allowed to overpower the other and both play a vital role in delivering on our promise of musical neutrality and acoustic transparency. The physical speakers are designed to sit comfortably within their environment. They are a beautiful statement, but one where perfectly balanced design neutrality means they will blend in for a lifetime of use.

Every Monitor Audio product is the result of intense collaboration, drawing on decades of experience within the design team and ensuring that all the elements of performance, technology and design work in harmony.

Creator Series Mount Boxes are the physical manifestation of this approach.

Creator Series, Mount Boxes

Model Overview

Why surface-mounted speakers?

Maximising placement and sound performance

The Mount Boxes provide integrators and DIY-installers the ability to position *any* Creator Series high-fidelity speaker, in almost any interior via surface-mounted on-wall or on-ceiling positioning, simply and easily.

Creator Series Mount Boxes provide:

- **Reduced Structural Impact** – Avoids the need for major modifications to walls or ceilings
- **Easy Accessibility** – Simplifies installation, maintenance, and adjustments
- **Flexible Installation** – Ideal for spaces where in-ceiling or in-wall speakers aren't feasible
- **Versatile Placement** – Allows extensive options and ensures optimal sound dispersion for different room layouts
- **Aesthetic Integration** – Sleek designs blend seamlessly with modern interiors

Why surface-mounted speakers?

Delivering Consistent Controlled Acoustic Performance.

The Creator Series Mount Boxes have been optimised to suit all Creator Series speakers. The Back Boxes ensure the exact volumes for optimum acoustic performance in any environment.

Creator Series Mount Boxes provide:

- **Enhanced Acoustic Performance** – The Mount Box creates a controlled acoustic environment, improving sound clarity, bass response, and overall sonic precision by reducing sound leakage and resonance
- **Consistent Sound Quality** – It ensures consistent performance by isolating the speaker from variations in wall construction and cavity size, delivering predictable and balanced audio
- **Reduced Sound Transmission** – The Mount Box prevents sound from bleeding into adjacent rooms or spaces, improving privacy and minimising audio disruption
- **Simplified Installation and Positioning** – The Mount Boxes provide a defined mounting space, aiding in more accurate speaker positioning and simplifying the speed and installation process for integrators

Creator Series – Mount Boxes

Expertly designed for a contemporary finish & high-fidelity sound

The Creator Series Mount Boxes, build-in several subtle, yet highly useful design details that enable simple and efficient installation for residential or commercial placement options and high-fidelity performance:

1

Secure fitment - 'through-screw' fixing holes with internal screw covers to seal the enclosure

2

Rubber bung for speaker cables – creates a seamless, secure fixture

3

Speaker cabinet quality and elegance, featuring contemporary satin painted finishes

4

High-quality grille with shadow gap, featuring a magnetic logo for horizontal or vertical placement

5

Padded cut-out hole for more a precise and seamless speaker fitment

Creator Series, Mount Boxes

Creator Series Mount Boxes come in five different sizes to suit the Tier 1, Tier 2 and Tier 3 Creator Series In-Ceiling and In-Wall medium models.

Ideal for audio applications where in-wall or in-ceiling speaker placement isn't possible.

CS Mount Box
Suits all 'Small' models

CM Mount Box
Suits all 'Medium' models

CL Mount Box
Suits all 'Large' models

CL-D Mount Box
Suits all 'Deep' models

WM Mount Box
Suits all 'Medium In-Wall' models

Installation Amplifiers 2G

Superior power for your outdoor, or indoor, system.

Behind every great home cinema, multi-room system or outdoor installation lies smart and powerful amplification.

That’s why every model in Monitor Audio’s comprehensive range of high-performance amplifiers can deliver precise, head-turning power in the blink of an eye. Perfect for a dynamic experience with movies, music or the big match, inside or even outside in a garden system.

Engineered to deliver pristine performance, they benefit from robust build, intuitive technologies and comprehensive connection options. They are also the perfect partners for Monitor Audio’s IMS-4 music streamer, which uses BluOS™ streaming technology and can play music in up to four separate zones, including a garden.

Installation Amplifiers 2G also support configurable EQ profiles designed specifically for Creator and Climate Series 3G. This allows total control over system setup and will enable achieving best audio performance in any environment.
